SUMMARY

Four years in product design, from research and customer journey mapping to release. Owned product design at an AI startup: a document assistant from zero to MVP on two platforms, then a ten-tool workspace in six weeks. Alongside it, e-commerce and enterprise products, and the design systems they ship from.

EXPERIENCE

Product Designer — Freelance Mar 2022 – Present

Remote · art platform, crypto product, design mentoring

- **Syno.art** (2026–Present): art platform based in Cyprus. Designed the artist side end to end (auth, profile and portfolio, the open-call flow and applications dashboard) across desktop and mobile, on a design system of its own with primitive, semantic and adaptive token layers.
- **Cryptomi** (2023–2024): interfaces for a crypto product; dense, data-heavy flows made approachable.
- **Abramova School** (2023–2024): UX/UI design alongside mentoring junior designers through critiques, portfolio reviews and feedback.

Product Designer — Hooh Jan 2025 – Mar 2026

Full-time, remote · AI document assistant, iOS and web · startup · the only product designer, with a PM, product owner, art director and two engineers · Cases: AI assistant MVP, Document workspace

- Designed and shipped the MVP on web and iOS: upload, layered AI summaries, assistant chat and file organization.
- Designed the trust model for an assistant that can be wrong: source citations on every claim, user-controlled document scope, stated uncertainty, the original always one tap away.
- Extended the reader into a document workspace: Smart Fill (form fields recognized and filled from the user's own documents, every value overridable), reusable signature, non-destructive markup and versioning. All tools share one scaffold and were handed off complete, together with the design system the team ships from.

Product Designer — iTAB May 2024 – Apr 2026

Part-time, remote · health and wellness e-commerce · web and mobile app · Cases: Specialist consultations, Product card

- Designed the specialist-consultations service end to end (specialist listing, specialist card and the user-side booking flow), alongside the homepage, the product catalog and sections across the app and the site.
- Redesigned the supplement product card across web and mobile to cut drop-off in a high-trust category. Drop-off fell and add-to-cart rose on every step redesigned, and the card became the catalog-wide standard; figures under NDA.

UX/UI Designer — Infomedia May 2023 – Dec 2024

Full-time, remote · communication products

- Designed client-facing web and mobile products for Russian Railways (RZD) and Rosatom, turning requirements written for engineers into flows their users could follow. Project details under NDA.

SKILLS

AI products: LLM assistants and conversational UI · progressive disclosure of model output · source citations and provenance · scoped context control · uncertainty and failure states · human-in-the-loop override

Design: Product and UX/UI design · interaction design · information architecture · user flows · interactive prototyping · responsive design · iOS and web

Design systems: Component libraries · design tokens · theming and dark mode · adaptive breakpoints · design QA

Research and delivery: Usability testing · user interviews · UX audit · competitor analysis · developer handoff and specs · mentoring

Tools: Figma (variables, components, auto-layout, Plugin API) · FigJam · AI coding agents (Claude Code, Codex) to build working prototypes in HTML and Xcode and custom Figma plugins for bulk token audits and migrations

EDUCATION

Pragmatica, "Big Practice" UI design program. 2025.

Uprock School, certificate in product and UX/UI design. 2022–2024.

Syktyvkar State University, Master's degree in Ecology. 2019–2021.

Ukhta State Technical University, Bachelor's degree in Geodesy for Land Management and Cadastre. 2012–2016.
